ABOUT ME

I hold a Bachelor's degree in Computer Science and Technology, with a strong academic and technical background in software development, data analysis, Embedded Systems, AI, and Web Development. My professional experience includes technical support and troubleshooting in domain and web hosting services, as well as financial administration, project coordination, monitoring, and stakeholder engagement in community-based development programs.

These diverse roles have strengthened my technical problem-solving, communication, and organizational skills. I am adaptable to multidisciplinary work environments and capable of applying both technical knowledge and professional experience to practical challenges. My interests lie in AI-driven embedded systems, smart sensing, and innovative technologies that integrate hardware and software to address real-world challenges.
